

Keyscan Access Control

# Systems without Limits, Innovation without Boundaries

**North American designed,  
engineered & manufactured**

**Software that controls  
1 or 1000s of doors**

**Flexible software  
add-on modules**

**Unmatched sales and  
technical support**

Keyscan Access Control Systems has an international reputation for versatility, flexibility and scalability. These unique attributes allow dealers to provide their customers with total control from one system.

Because we design and engineer all of our hardware and software, we ensure the highest level of quality and seamless integration throughout our line of products.

Focusing on Keyscan Access Control System's single hardware and software approach, dealers benefit from a truly consolidated access control product solution for your marketplace, reducing staff training time and optimizing your service capability.
