

## SIMPLEX & PUSH BUTTON LOCKS ANNOUNCEMENT

Affirming our value-conscious, services-led approach to support our channel partners, effective immediately, the Simplex brand of mechanical push-button locks will be supported and sold by the dormakaba North American Electronic Access and Data sales team.

The popular Simplex brand series has long been the standard of mechanical push-button locks and now joins the E-Plex electronic stand-alone and wireless locks, PowerPlex electronic pushbutton locks, RCI electronic access controls and Keyscan access control systems as part of the EAD product offering. Significant shifts in the products and services being offered by dormakaba EAD and a deeper value potential has determined this change in our go-to-market strategy.

Simplex mechanical pushbutton locks offer convenient, controlled access between public and private areas. There are no keys or cards to manage, no computers to program, no batteries to replace, and combinations can be changed in seconds without removing the lock from the door.

Simplex locks are available for:

- Standard doors
- Narrow stile doors
- Specialized openings

For sales and service, please contact your dormakaba EAD sales representative.
