## K-SMART

Contactless Smartcard Reader

### Introducing K-SMART Mifare Contactless Smartcard Readers

K-SMART re-defines the standard for ultra-secure readers. And because it's from Keyscan, you get unsurpassed reliability with our legendary quality. See for yourself why it's the smart choice in readers:

- Uses acclaimed Mifare contactless smartcard technology (13.56 MHz)
- Supports Keyscan's K-SECURE contactless Mifare smartcards with Max-Secure card/reader encryption technology
- Supports ISO 14443 Mifare contactless nonproprietary contactless smartcards - card serial number (CSN) only
- Has reader supervision using an ingenious "heartbeat" technology for added security with Keyscan systems
- Offers an "anti-tamper" configuration when connected with a tamper switch for critical or sensitive areas
- Designed for indoor and outdoor applications

Coming soon – U.S. Government FIPS 201 & TWIC and HID 125 - K-SMART reader formats.

### K-SECURE – Mifare Contactless Smartcard with Max Secure™

The choice just got better for contactless smartcards. Keyscan's K-SECURE 13.56MHz smartcards offer higher credential security and increased protection:

- Uses internationally acclaimed Mifare contactless smartcard technology
- Offers Max Secure™ card & reader encryption technology for the highest level of card security available
- Provides the highest level of credential anti-counterfeiting protection & protects against standard 125 kHz 26-bit duplicate card concerns
- Complies with international interoperability ISO14443 standards for 3<sup>rd</sup> party applications such as cashless vending
- Works in conjunction with Keyscan K-SMART readers

K-SECURE Mifare contactless smartcards are ISO format suitable for dye sublimation printing.
