Keyscan's K-DSC Software Module

integrates
a
DSC
Power Series
intrusion
panel
with
System VII

K-DSC – Integration Software

Keyscan gives you even more flexibility. Introducing the all-new, highly-effective K-DSC software module that integrates System VII with a DSC Power Series intrusion panel. With the K-DSC module, you can say good-bye to those cryptic codes. Simply define user privileges, make some system configuration settings and the DSC intrusion panel is integrated in System VII. You're good to go. Here are some of the other terrific advantages the K-DSC module offers:

- monitor in real-time the current status of zones/partitions
- monitor other critical DSC intrusion panel system functions, such as battery status, panel AC status and fire status
- arm or disarm individual partitions with manual overrides
- use Keyscan's Present3 at target readers for remote arming and disarming of partitions
- use System VII's email alarm notification option to warn you if a specific DSC alarm has been tripped
- reports any DSC alarms in the System VII Alarm Monitoring screen for enhanced system monitoring
- use System VII's Transaction Reports to run summaries of DSC intrusion panel activity for analysis and investigation
- add DSC alarm partitions icons on a Keyscan "active map" for real-time monitoring with manual arming and disarming overrides

The K-DSC adds even more "flex" to Keyscan's legendary system flexibility. Please note the K-DSC module is only compatible with DSC's Power Series intrusion panels. K-DSC integration requires a DSC IT-100 module from your DSC hardware supplier. Also requires System VII version 7.0.8 or higher.

Updated to System VII version 7.0.8 Yet?

And speaking of System VII, have you updated to version 7.08. We've built in even more great features and enhancements to ensure System VII continues to be the leading access control management software in the security industry.

Contact Keyscan

If you would like more information about the K-DSC Power Series Intrusion Panel software module, contact Keyscan sales or marketing at 1.888.539.7226 (toll free Canada/USA) or 905.430.7226, or www.keyscan.ca.
